

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

MINOR NOTICES

Scientific expedition to New Guinea.—The botanical results, so far as published, of the Dutch scientific expedition to New Guinea in 1907 under the auspices of Dr. H. A. LORENTZ are embodied in the present volume.³ The groups of plants treated and the specialists who have collaborated in the work are as follows: Filices by H. CHRIST; Palmae by O. BECCARI; Ebenaceae and Loganiaceae by W. P. HIERN; Taxaceae, Sapindaceae, Elaeocarpaceae, Ericaceae, and Gentianaceae by S. H. KOORDERS; Stemonaceae, Burmanniaceae, Corsiaceae, and Orchidaceae by J. J. SMITH; and the Triuridaceae and Polygalaceae by F. A. F. C. WENT. The work is based primarily on the collections made by Dr. G. M. VERSTEEG, collector of the expedition, although plants obtained from other recent expeditions have been included. The treatment of the Orchidaceae occupies by far the greater part of the volume, this family alone being represented by about 60 genera and approximately 240 species. Of these, five species and eleven varieties are described here for the first time, and several are of recent publication. The descriptions of the orchids are supplemented by 46 lithographic plates which beautifully portray the floral characters of more than 150 different species. Of the 73 species of ferns listed, 17 are new to science. The other groups contained in the volume are represented by fewer species, not over 50 in all, but about one-half of these are new. One new genus (*Neojunghuhnia*) of the Ericaceae is described and illustrated. The publication is an important contribution to taxonomic literature.—J. M. GREENMAN.

A memorial volume for Junghuhn.—FRANZ JUNGHUHN was one of the pioneer scientific explorers of Java, and it is very fitting that the centenary of his birth should be celebrated by the publication of a memorial volume,⁴ which recalls his many-sided activities and large contributions. JUNGHUHN was born the same year as DARWIN, and after a somewhat stormy youth in his German fatherland, he journeyed to Java, where he remained for many years. Upon his return he became a citizen of the Netherlands, but again returned to Java, occupying a government position there until his death in 1864. The volume contains an account of his life by M. SCHMIDT, and sketches of JUNGHUHN's contributions to geology, geography, botany, climatology, ethnography, etc., by those best fitted to speak. The botanical sketches are by KOORDERS, who contributes *Plantae Junghuhnianae ineditae*, *Kritische opmerkingen over de etiketteering van Junghuhn's botanische collecties in 's Rijks Herbarium*, and *Over Junghuhn's verdiensten voor de plantengeographie van Java*. JUNGHUHN is probably best

³ Nova Guinea. Résultats de l'expédition scientifique Néerlandaise à la Nouvelle-Guinée en 1907 sous les auspices du Dr. H. A. LORENTZ. Vol. VIII, Botanique. Livraison 1. 4to. pp. 220. pls. 51. Leide: E. J. Brill. 1909.

⁴ Gedenkboek FRANZ JUNGHUHN 1809-1909. pp. x+361, with portraits of FRANZ and MEVROUW JUNGHUHN, 5 plates, and 48 reproductions of photographs taken by JUNGHUHN. Published by De Junghuhn Commissie. The Hague: Martinus Nijhoff. 1910. Fl. 8; geb. Fl. 10.
